Working Papers

The Cultural Foundations of State Legitimacy: Kinship and Institutional Mismatch, 2025.

Identifies an institutional mismatch between formal rules and informal norms. Using a spatial RDD across partitioned ethnic homelands, the paper shows that rigid Civil Law clashes with kinship norms, reducing local economic activity by 11% and aggregate GDP by 4%. Common Law systems can absorb these norms, mitigating the loss. The mechanism of state legitimacy is identified using survey micro-data and validated using the 2016 Anglophone Crisis in Cameroon.

Corporations as the State: Concessions, Urbanization, and Long-Run Development in the Copperbelt, African Economic History Working Paper No. 85, 2025.
